PARTS AND FEATURES

Important Safety Instructions

WARNING

To reduce the risk of fire, electrical shock, or injury when using your appliance, follow these basic precautions:

- Read all instructions before using the appliance.
- **DANGER or WARNING:** Risk of child entrapment.
- Child entrapment and suffocation are not problems of the past. Junked or abandoned appliances are still dangerous. . . even if they will “just sit in the garage a few days.”
- **Before you throw away your old appliance:** Take off the door so that children may not easily climb inside.
- Never allow children to operate, play with, or crawl inside the appliance.
- Never clean appliance parts with flammable fluids. The fumes can create a fire hazard or explosion.
- Do not place the dryer in steamy rooms or where the dryer is directly exposed to rain. Moisture may destroy the electrical insulation causing an electrical shock hazard.
- During spinning, don't put your hand in the spin basket: Because the spin basket is rotating at high speed, rotating parts may injure your hand.
- Do not store or use gasoline or any other flammable vapors and liquids in the vicinity of this or any other appliance. The fumes can create a fire hazard or explosion.

-Save these instructions-

INSTALLATION INSTRUCTIONS

➤ Before Using Your Appliance

- Remove the exterior and interior packing.
- Check to be sure you have all of the following parts:
- Instruction Manual
- Allow at least 5 inches of space between the sides of the appliance.
- Put your laundry into the dryer evenly. Uneven laundry may cause noise or vibration.
- Before drying, check all pockets. If nails or pins remain in pockets, they may damage the dryer or clothes.
- Never splash water on the control panel.
- Plug the dryer into an exclusive properly installed-grounded wall outlet. Do not under any circumstances cut or remove the third (ground) prong from the power cord. Any questions concerning power and or grounding should be directed toward a certified electrician or a Smart+ Products service center.

➤ Selecting a Location

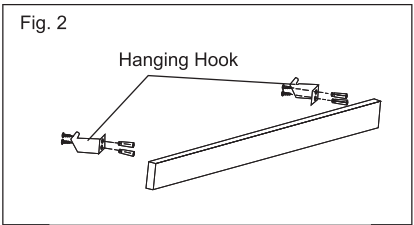

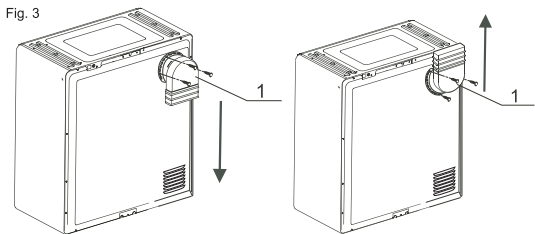

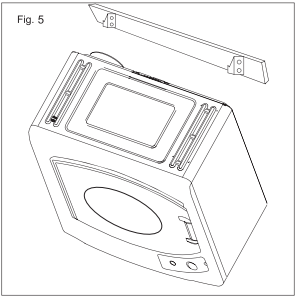

Before you install the dryer, select a location with the following characteristics:

- A hard level surface (if the surface is uneven, see “Adjusting the Leveling Legs”).
- If you are going to wall mount your dryer using the wall mounting kit included (see “Wall Mounting Instructions”)
- Away from direct sunlight. Direct sunlight may affect the acrylic coating, plastic and electrical components.
- Adequate ventilation
- Room temperature that will not fall below 0°C.
- Away from sources of heat such as coal or gas. Make sure that the dryer does not stand on its power cord. Ventilation openings must not be obstructed by carpeting when the dryer is installed on a carpeted floor.

➤ Wall Mounting Instructions

**** It is recommended to complete the following procedure with at least 2 people ****

Tools Required		
Tools and parts required for Plaster and or Wood Installation	Drill & Drill Bit	1
	Phillips Head Screw Driver	1
	Wood screws 2" long	4
Wall Mounting Kit Includes the following:		
Description	Wall Hanging Bracket	2
	Wall Hanging Hook	2
	Plastic Spacers	2
	Exhaust Pipe	4 (Pieces)

a)	<p>Determine the position where you will be installing the mounting bracket. (This dryer is not designed to sit directly on top of your washing machine).</p> <p>(A minimum of 2 inches is required between the top of the dryer and the ceiling to allow easy installation and adequate space for exhaust).</p> <p>(If mounting above a washing machine, allow sufficient spacing to open the lid of the washer or breathing room in the case of a front loading washer).</p>	
b)	<p>Affix the wall mounting bracket (included) securely to the wall (directly to the stud).</p> <p>(If a stud is not available, use a wooden slat between the studs to mount the bracket)</p>	 <p>Fig. 2</p> <p>Hanging Hook</p>
c)	Install the Wall Hanging Hooks as shown in illustration (Fig. 2).	
d)	<p>Install the exhaust pipe as shown in illustration (Fig. 3). (Installation hardware included)</p> <ul style="list-style-type: none"> For a downward exhaust join the sections (1) pointing downward. For an upward exhaust join the sections (1) pointing upward. 	 <p>Fig. 3</p>
e)	<p>Mount the dryer on the wall bracket as shown in illustration (Fig. 4).</p> <p>** It is recommended that this step be done by two (2) or more persons **</p>	
		 <p>Fig. 5</p>

➤ Adjusting the leveling legs

Your dryer is shipped with the legs in the bag containing your user's guide. To install and adjust the leveling legs see the illustration to the right.

If the floor is uneven adjust the legs (do not insert pieces of wood, or any other objects under the legs)

- Adjust the height level of the legs accordingly.

Place the dryer on a sturdy flat surface.

If the dryer is placed on an uneven or weak surface, noise or vibration will occur. (Allowable is 1°)

➤ Electrical Connection

⚡ Warning ⚡

Improper use of the grounded plug can result in the risk of electrical shock. If the power cord is damaged, have it replaced by an authorized Smart Products service center.

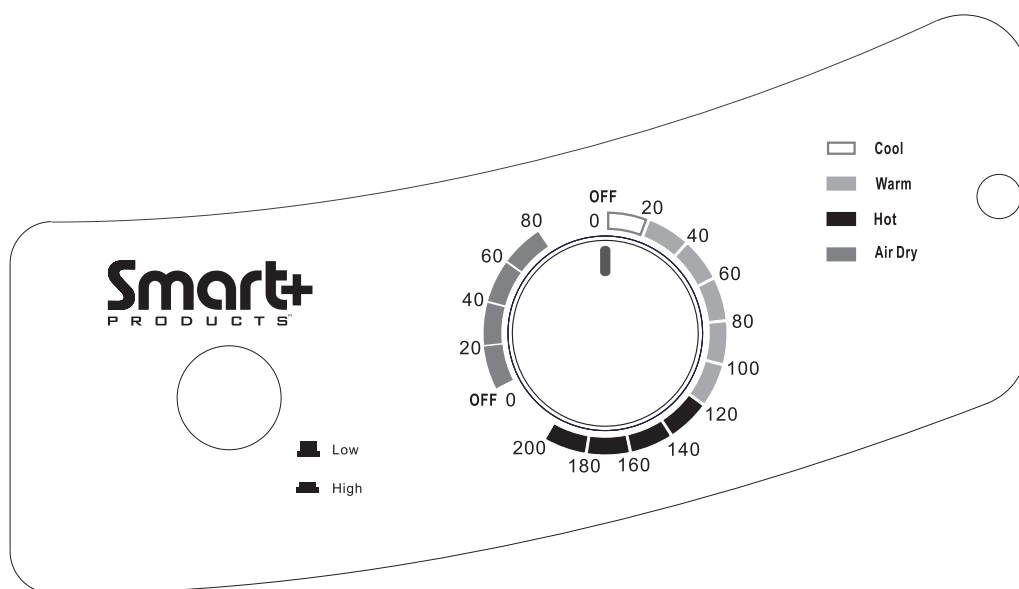

This appliance should be properly grounded for your safety. The power cord of this appliance is equipped with a three-prong plug which mates with standard three prong wall outlets to minimize the possibility of electrical shock.

Do not under any circumstances cut or remove the third ground prong from the power cord supplied.

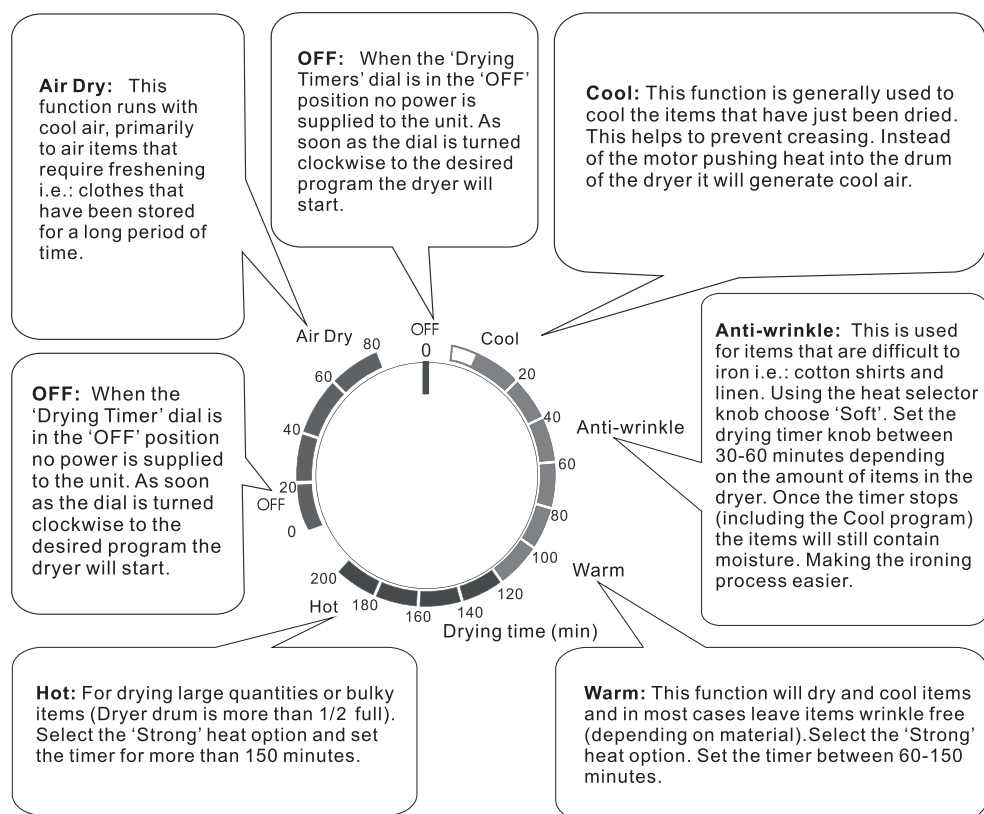

Use of extension cord is not recommended.

This appliance requires a standard 110/120-volt, 60Hz electrical outlet with three-prong ground. The cord should be secured behind the appliance and not left exposed or dangling to prevent accidental injury.

➤ CONTROL PANEL

➤ OPERATING INSTRUCTIONS

➤ CONTROL PANEL FUNCTIONS

Heat Selector button

Select 'High Heat' for items that are particularly bulky or large quantities.

Select 'Low Heat' for delicate items such as Silk, nylon, linen etc.

Low
High

Heat Selector Knob

Drying Program Selector

There are five drying combinations available: Cool, Anti-wrinkle, Warm, Hot and Air dry.

➤ DRYING TIME REFERENCE

**** LOAD WEIGHTS AND RESPECTIVE DRYING TIMES ARE APPROXIMATE ****

Drying Capacity	Drying Times	
	High Heat	Low Heat
3 (Three) Lbs	30 Minutes	55 Minutes
5 (Five) Lbs	60 Minutes	110 Minutes
7 (Seven) Lbs	120 Minutes	
9 (Nine) Lbs	200 Minutes	

Sorting Fabrics

For the best drying results, clothes should be sorted properly. Separate the lint shedders (chenille and terry cloth) from the lint collectors (synthetics, flannel and fabrics with a nap, such as velveteen and corduroy). Separate non-colorfast from light colored items, heavy fabrics from light weight fabrics and permanent press from heavy, bulky items.

Do not tumble dry

Read all permanent care labels carefully. If a garment's care label says "Drip Dry", Line Dry or "Dry Flat", do not dry in the dryer. Certain materials will melt or become dangerously flammable if heated, while others may lose their shape. Other items that should not be tumble dried are:

- Items that have been dry-cleaned at home.
- Wool (unless the garment's manufacturer recommends it)
- Fiberglass
- Laminated or rubber coated items
- Vinyl or plastic
- Do not use fabric softeners or products to eliminate static unless recommended by manufacturer of the fabric softener or product.

WARNING:

To reduce the risk of fire, electric shock, or injury to persons, read the IMPORTANT SAFETY INSTRUCTIONS before operating this appliance.

Drying Time

Drying time depends on many factors, such as the amount of washing, how damp it is, the type of fabrics, rated power of the machine and the temperature of the room. It also, of course, depends on how dry you want the washing when you take it out of the machine.

Shrinkage

Knitted fabrics in particular are liable to shrink. Do not use the extra dry program for these materials, and always stretch them out directly after drying.

Dryer Added Fabric Softeners

Because some dryer added fabric softeners may cause damage to automatic dryers, use only ones that the manufacturers give a written assurance that their softeners can safely be used in your dryer.

Single Items

Use the timed program when there is only one item to be dried. This is because the automatic program may turn off the heating too early, so that the item is not properly dried.

If The Washing Is Not Dry After Tumble-Drying

When using the automatic programs, it can happen that not all of the washing is properly dry. This may be due to such reasons as very heavy fabrics or thick seams. To dry these items, give a further 10 minutes or so in the timed program. Also do not overload the dryer. If the dryer is overloaded, its efficiency is lessened and clothes may not dry evenly.

Do not over-dry

When using the timed program, it is possible to over-dry fabrics, if too long a time has been set. This can cause the fabrics to wrinkle, shrink or feel harsh. Synthetic materials can also become charged with static electricity.

Fabric Care Chart

	Resistant material		Can be ironed at 100°C max
	Delicate fabric		Do not iron
	Item may be washed at 95°C		Can be dry cleaned using any solvent
	Item may be washed at 60°C		Dry clean with perchloride, lighter fuel, pure alcohol or R113 only
	Item may be washed at 40°C		Dry clean with aviation fuel, pure alcohol or R113 only
	Item may be washed at 30°C		Do not dry clean
	Item may be hand washed		Dry flat
	Dry clean only		Can be hung to dry
	Can be bleached in cold water		Dry on clothes hanger
	Do not bleach		Tumble dry, normal heat
	Can be ironed at 200°C max		Tumble dry, reduced heat
	Can be ironed at 150°C max		Do not tumble dry

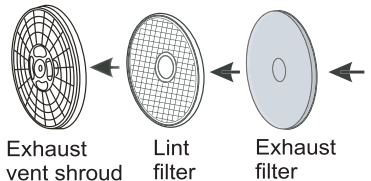

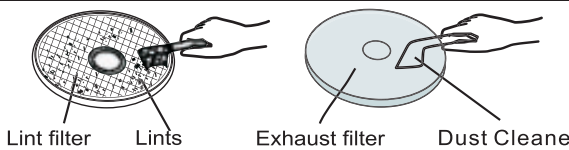

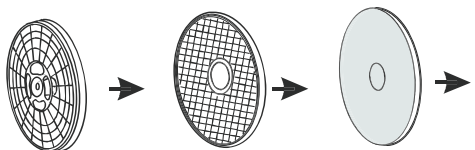

CARE AND MAINTENANCE

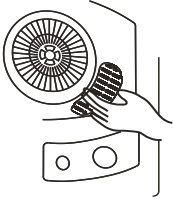

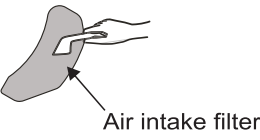

➤ Cleaning the Exterior

- Wipe the dryer surfaces, including the control panel, with a soft cloth and non-abrasive household detergents.
- Use a soft cloth to dry the surfaces.
- Do not pour water on the dryer.

➤ Cleaning the Filters

Unplug the power cord prior to any cleaning.

Cleaning the Lint Filter:	
a)	<p>Removing the Lint Filters: Remove by pulling outward using the four (4) grip holes in the filter assembly.</p> <p>ALL FILTERS MUST BE IN PLACE WHEN DRYING</p> <p>FILTERS MUST BE CLEANED BEFORE AND AFTER EACH USE.</p>
b)	<p>The filter assembly consists of three (3) parts (See illustration)</p> <ol style="list-style-type: none"> Exhaust Vent Shroud Lint Filter Exhaust Filter 
c)	<p>Separate each of the above parts and clean the individual pieces using a SOFT brush or vacuum cleaner. DO NOT damage the filters</p> 
d)	<p>Re-install the filter assembly Reassemble the filter assembly in order Exhaust Filter – Lint Filter – Exhaust Shroud Align the entire assembly with the recessed position in the back of the drum and press firmly until the entire assembly is secure.</p>  <p style="text-align: right;">Figure 3</p>

Cleaning the Air Intake Filter	
a)	<p>Removing the Air Intake Filter: Remove by pulling outward holding the filter housing by the top and bottom.</p> 
b)	<p>Remove the filter inside the housing and clean using a SOFT brush or vacuum cleaner.</p>  <p style="text-align: right;">Air intake filter</p>
c)	<p>Replace the filter housing by pushing upwards with your thumb until the latch is secure.</p>

PROBLEMS WITH YOUR DRYER?

You can solve many common appliance problems easily, saving you the cost of a possible service call. Try the suggestions below to see if you can solve the problem before calling the servicer.

TROUBLESHOOTING GUIDE

Problem	Possible Cause	What to do
Timer knob does not turn	<ul style="list-style-type: none"> Is the power cord inserted firmly? 	<ul style="list-style-type: none"> Insert the power cord firmly
Drum does not turn	<ul style="list-style-type: none"> Is the door closed? Is the power cord inserted? Does the receptacle have power? 	<ul style="list-style-type: none"> Close the door. Insert the power cord firmly. Check the power cord receptacle.
Hot air is not blowing out	<ul style="list-style-type: none"> Is the timer incorrectly set on cold air? 	<ul style="list-style-type: none"> Set the timer to hot air.
The laundry is not thoroughly dried	<ul style="list-style-type: none"> Are the front and back filters clogged? Is there too much laundry in the dryer? Have items been added whilst the dryer is in operation? Has the laundry become twisted whilst drying? Has the dryer been placed in a small and badly ventilated area? Have you set the dryer to Anti-Wrinkle? 	<ul style="list-style-type: none"> Clean the filter. Reduce the amount in the dryer. Re-dry the items again Untwist the items and re-dry. Place the dryer in a well-vented area. Try using 'Warm' or 'Hot' setting instead
Dryer does not start	<ul style="list-style-type: none"> Is there a power failure? Is the power cord inserted firmly? Is the door closed? Is the timer in the OFF position? 	<ul style="list-style-type: none"> Try again when there is power Insert the power cord firmly Close the door Set the dry time

Model	SPP98D
Drying Capacity	8.8Lbs
Power Source	120V~ 60Hz
Rated Input	1400W
Net Weight	44Lbs
Dimensions	23.6"W×17.1"D×27.5"H
